💡 10 years of IT experience transitioning four years ago into networks and ethical hacking.

PROFESSIONAL SUMMARY

Information Systems Specialist with 10 years of experience in the design, implementation, and maintenance of computer networks. Skilled in information security, operating system management (Windows, macOS, Linux, terminal usage), and systems administration. Possesses strong problem-solving skills, teamwork abilities, soft skills, and critical thinking.

Professional Experience

Network Infrastructure Technician – IT Support

Secretaría de Transporte Jalisco | June 2024 – Present

- Participated in multiple network installation projects within and outside the state.
- Provided support for operating systems and resolved LAN and WiFi network issues.
- Applied knowledge of network protocols (TCP, IP, DHCP, DNS, SMTP, FTP).

Network Engineer & Technical Support

Consulate of Colombia in Guadalajara | June 2018 – May 2024

- Designed and implemented network infrastructure.
- Maintained and updated Windows servers and storage systems.
- Provided remote support, configured VPN connections, and monitored WiFi networks.
- Performed incremental backups and disk cloning.

IT Support Technician

POSMEX | 2007 – 2017

- Delivered technical support for hardware and connectivity issues.
- Configured and maintained network equipment including routers and switches.
- Installed POS systems for major restaurant chains (Outback Steakhouse, Chilis, Wings, etc.).
- Extensive experience in assembling desktops and high-performance/gaming computers.
